A Survey of Techniques for Internet Traffic Identification and Classification

Mingwei Wei, *Member, IEEE*

Abstract—The techniques for internet traffic identification and classification are developed rapidly in recent years, as it widely used in network management, monitor, design, security and research.

Index Terms—traffic identification, traffic classification, challenges, remarks.

I. INTRODUCTION

THIS demo file is intended to serve as a "starter file" for IEEE journal papers produced under LATEX using IEEEtran.cls version 1.7 and later. I wish you the best of success.
